# ScoutLED<sup>®</sup>

Rechargeable anti black-out LED lamp

Portable LED lamp suitable for intense "outdoor" use with battery duration up to 85 hours and anti black-out function.

**Beghelli**

# ScoutLED®

Rechargeable anti black-out LED lamp

Automatic flashing activation push button

Secondary LED "parking light"

**Secondary LED battery duration up to 85 hours**

Mains and re-charge red LED indicator

"Built in" re-charge cable compartment

Supplied with shoulder strap

**ScoutLED** is a new rechargeable and portable anti black-out Beghelli lamp suitable for an intense outdoor use. Thanks to its high power LED, Scout LED grants an exceptional light output and a very long battery duration. When connected to the power mains, it will automatically switch on in case of black out.

Two way "min/max" switch button

High power main LED: 2,4W with lenticular lens and mirror-like parabolic reflector

**Main LED battery duration up to 9,5 hours**

High capacity built-in internal rechargeable battery

Supplied with three colored diffusing screens housed in the internal compartment

When connected to a power socket with the switch button set either on min or max position, Scout LED will switch on automatically in case of black-out and then off again when power comes back. A red colour LED positioned on the reflector marks the proper connection of the unit to the mains.

**ANTI BLACK-OUT function**

The tilting head can rotate by 120° and set in any intermediate position.

The ScoutLED lower body can be opened at the bottom accessing a compartment where the power cable and the coloured diffusing screens can be stored. The flashing function can be activated on the main or on the secondary LED thanks to a switch button placed on top of the fixture.

## ScoutLED

<b>Part Number</b>	<b>8380</b>
<b>EAN code</b>	<b>8002219508058</b>
<b>Package</b>	<b>6 pcs</b>
<b>Duration</b>	<b>9.5 hrs / 85 hrs</b>
<b>Built in rechargeable battery</b>	<b>Pb 6V / 4.5Ah</b>
